Miroslav Krsmanovic

web designer / developer

[devfolio](#) ↗

Graphic designer with 5+ years of experience in brand id and web design. Skilled at Adobe Creative Suite (Photoshop and Illustrator), Sketch, Figma... Starting my career at 99desgin, Freelancer.com, and then moving to Upwork I had the opportunity to work with more than 600 clients from all parts of the world.

Since last year my main preoccupation has been FrontEnd development because I always wanted to make my ideas live!:) I'm in process of learning React - loved the idea of component-based architecture!
